Now you can implement Pulse Width Modulated (PWM) technology on pull-type sprayers and fertilizer applicators, thanks to four new Ace pumps with integrated control valves. These pumps offer quick rate changes for variable or fixed rate applications. Plus, they only run as fast as necessary, minimizing horsepower along with wear and tear on the pump and other components.

HYDRAULIC DRIVEN PUMPS

Hydraulic Selection Guide

Ace Pumps began compiling tractor hydraulic data in the 1970's which was included in our operating manuals at the time. In the late 1980's, we began publishing our Hydraulic Selection Guide as a separate book that was included in the box with each pump. The guide showed our customers which Ace Pumps were recommended for their tractor's hydraulic system and the proper setup procedures.

Over the years, we have cataloged hydraulic data on thousands of tractor models including hydraulic system type, flow, and pressure. This led to our guide being sought out by many other companies in the agricultural market as a resource. Ace continues this effort today with our iHSG (internet Hydraulic Selection Guide) which is available by scanning the QR code.

STANDARD WARRANTY

Ace pumps and valves are guaranteed against defects in material and workmanship for a period of one year from date of installation. Products or parts found to be defective upon inspection at the factory will be repaired or replaced at our discretion.

Ace Pump Corporation shall not be held liable for damages caused by abuse or misuse of the product or parts. No claim for labor in repairing or replacing such products will be allowed nor will loss of time or inconvenience be considered warranty obligations.

IMPORTANT: Pumps or valves returned for warranty consideration which are tested and found to perform within specifications are subject to an inspection charge.

PLEASE NOTE EXCEPTIONS

1. All seals are covered against defects in materials or workmanship. Seal failures resulting from application related conditions are not covered. Most seal failures are due to application conditions such as: (1) abrasive solution scratching the polished seal faces; (2) chemical attack on elastomers or glue; (3) thermal shock from running pump dry or improper priming; (4) failure to flush chemical from pump after use.
2. Gasoline engines are covered by the engine manufacturer's warranty. Engines submitted for warranty consideration should be returned to the nearest authorized engine repair station. **DO NOT RETURN ENGINE TO ACE PUMP CORPORATION.** If unable to locate nearest engine repair station, consult Ace for referral.
3. On Ace belt driven centrifugal pumps, belt alignment is not to be considered as covered by warranty. Misalignment can occur in transit and is easily corrected at point of installation.
4. Repair requests under the above categories will not be considered warranty, and current repair and transportation charges will apply.

PROCEDURE

To return pump, valve, or part for warranty consideration, please call Ace Pump at 901-948-8514 and request a Returned Goods Authorization (RGA) number. Please request one RGA number for each pump or valve. Provide the part number of the item being returned along with the reason for return. Be specific when describing the nature of the defect. Include this information in the box along with a customer contact name, phone number, and return address. Ship pump prepaid freight. Package pump in original packaging or similar to prevent damage in shipment. Warranty determinations will be made after the product has been received and inspected.

This warranty is in lieu of all other warranties, express or implied, and Ace Pump Corp. does not authorize any other person to assume for it any obligation or liability in connection with the sale of said pumps, valves, or any parts thereof.

WARNING: Pumps returned to Ace must be free of chemical hazard. Chemicals must be neutralized and thoroughly rinsed. Pumps with indications of active chemical will not be considered for repair or warranty.
