HYDRAULIC INFO

There are three general types of hydraulic systems:

- 1) Load Sensing (LS), also known as Pressure-Flow Compensating (PFC) Closed Center
- 2) Pressure Compensating Closed Center (PC)
- 3) Open Center (OPEN)

Please consult the Tractor Hydraulic System Pump Selection Guide (HSG), Internet Hydraulic Selection Guide (IHS) at www.AcePumps.com, or your tractor dealer to determine your tractor's hydraulic system.

Product Updates

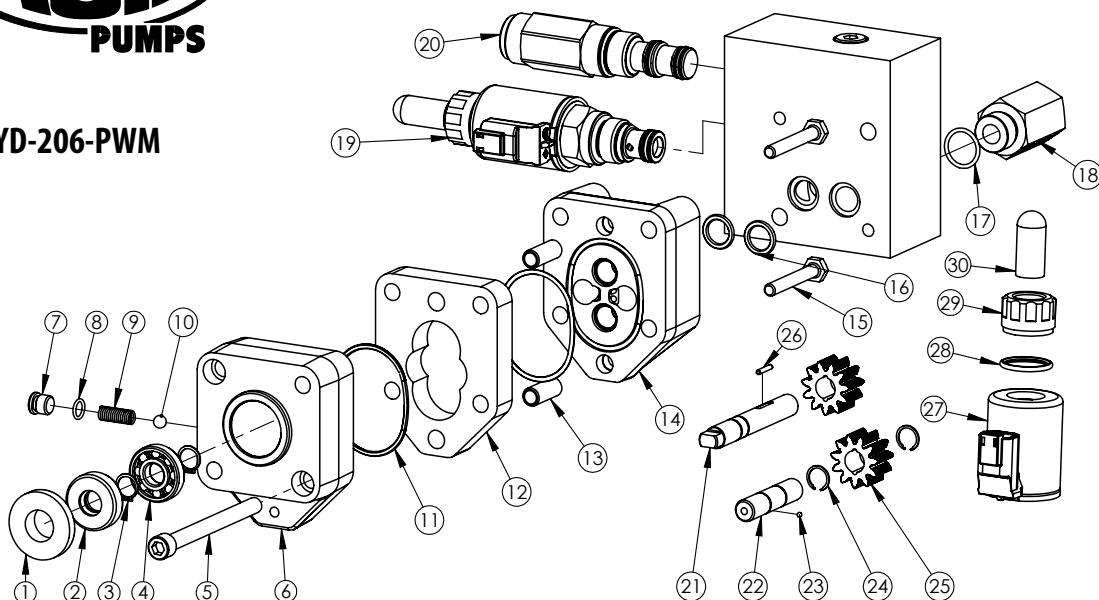

Please consult the following Product Updates for additional information on this motor series:

- Update 12 - Hydraulic Motor Seal Support Spacer
- Update 14 - 200N Series Motors
- Update 23 - New 200 Series Needle Valve Assembly

PWM HYDRAULIC INFO

There are three general types of hydraulic systems:

- 1) Load Sensing (LS), also known as Pressure-Flow Compensating (PFC) Closed Center
- 2) Pressure Compensating Closed Center (PC)
- 3) Open Center (OPEN)

This product is designed to operate on both Closed Center Hydraulic Systems. It should not be used with Open Center systems. Please consult the Tractor Hydraulic Selection Guide(HSG), Internet Hydraulic Selection Guide (IHSG) at www.AcePumps.com, or your tractor dealer to determine your tractor's hydraulic system.

The two valve design limits the maximum oil flow to the motor and prevents overspeeding. The Restrictor Orifice and Flow Limiter are not needed with this product.

All PWM controllers are slightly different in the terminology used and setup procedures. Please consult your controller documentation or their technical service department for additional assistance with your specific application and implement in use.
